

OLUWASEYI AJAYI

Backend Developer(Python-FastAPI/Django/Flask) | Creator of AuthEase (PyPI)

oluwaseyitemitope456@gmail.com | [GitHub](#) | [LinkedIn](#) | [Twitter](#) | [Portfolio](#) +2348108469203

SUMMARY

Backend Engineer with 5 years of professional experience building scalable, production-grade applications. Skilled in **Python(FastAPI, Django REST Framework, Flask)** with strong expertise in async/await and type-safe API design. Experienced in architecting secure authentication systems (**JWT, OAuth2, RBAC**), **RESTful APIs**, and multi-tenant database-driven architectures with **PostgreSQL, MongoDB** and **SQLAlchemy/SQLModel**. Proficient in background task management with **Celery** and **Redis** for distributed async processing, as well as TDD with **Pytest** and **Unittest**. Hands-on with **AWS (S3)**, **Docker**, and **CI/CD** pipelines for deployment and observability. Adept at collaborating in Agile/Scrum teams, integrating third-party services, contributing to open-source, and delivering reliable, high-performance backend solutions.

SKILLS

Back-End: Python, FastAPI, Flask, Django REST Framework, C#, .NET

Front-End: JavaScript, HTML5, CSS3, Bootstrap, Bulma, React, Typescript

Databases: SQLite3, PostgreSQL, MongoDB, MySQL

Async & Background Processing: Celery, Redis (job queues, caching, session management)

Testing & Code Quality: Pytest, Unittest, TDD, Flake8, Pydantic

Cloud & DevOps: Git, GitHub(GitHub Actions), Heroku, CI/CD, AWS, Docker, Hetzner

Professional: Remote Pair-Programming, Teamwork, Mentoring, Communicating, Problem-Solving, Scrum, Agile

WORK EXPERIENCE

SterneHero (Germany)

Backend Developer

Remote

- Architected and built a distributed review removal automation system using FastAPI, PostgreSQL, Celery, and Redis, handling asynchronous task orchestration, retry logic, and failure recovery in production.
- Designed advanced submission tracking logic with global 2-submission enforcement, cooldown protection, duplicate linking, and race-condition-safe database transactions, ensuring data integrity across multiple tasks.
- Integrated multiple **Google Business Profile APIs** (Account Management, Business Information, Reviews) with OAuth lifecycle management, quota-aware error handling, and optimised API responses using dynamic read masks.
- Engineered an intelligent Gmail automation and status classification system to parse legal responses, prevent abusive resubmissions, and protect accounts from suspension risks.
- Hardened production infrastructure by debugging Redis SSL EOF errors, Celery broker instability, and concurrency issues, implementing keepalive strategies, safe retries, and a deployment architecture designed for migration from Heroku to Hetzner.

Turbham Technologies (Startup Division – Zagaride)

Backend Developer,

Remote

October 2025 – January 2026

- Architected a production-grade ride-hailing API (60+ endpoints) managing complex passenger, driver, and admin lifecycles using Node.js, TypeScript, and PostgreSQL.
- Built a real-time matching engine with WebSockets and Polyline tracking, enabling dynamic driver-passenger connectivity and automated fare estimation.

- Strengthened platform security with JWT-based session management, RBAC, and targeted rate limiting against brute-force and injection attacks.
- Improved system performance by 30% through Redis caching and Prisma query optimisation, reducing latency across analytics and location services.
- Designed a fintech-ready settlement system automating commission breakdowns and driver payouts, enhancing financial accuracy and integrity.

Yetti Technology (Nigeria)

Python Developer

Remote

September 2022– September 2024

- Led development of backend services using **Django**, improving performance, scalability, and reliability across multiple applications.
- Designed and optimised PostgreSQL schemas with SQLAlchemy, reducing query response times through indexing, transactions, and query tuning.
- Strengthened engineering standards by establishing code reviews, Pytest-based testing, and CI/CD pipelines (GitHub Actions, Docker), improving team productivity and deployment reliability.

HIGHLIGHTED PERSONAL PROJECTS

Backend Developer

Auth Ease— An open-source Django package offering a plug-and-play authentication system with OAuth, JWT, RBAC and simple login features.

- **Stack:** Python, Django.
- **Live Link:** Available on the [PYPI website](#).

Auth Ease API — RESTful API for AuthEase, providing authentication endpoints with strict type validation and PostgreSQL persistence.

- **Stack:** Python, Django REST Framework, PostgreSQL.

Link Ease — A web application for simplifying link sharing with powerful URL shortening and QR code generation.

- **Stack:** Python, Flask, HTML/CSS3, Bootstrap, and Bulma.

YouTube Downloader Pro — A high-performance downloader with an **async backend architecture** for concurrent downloads, **quality selection (360p–4K)** and **real-time progress tracking** with an integrated modern GUI.

- **Stack:** Python, FastAPI, Asyncio

Student Management API — Experience seamless school management with the Student Management API—enabling admin functions, student registrations, course creation, and a streamlined grading system.

- **Stack:** Python, Flask_restx, SQLite3, Heroku, PostgreSQL

N/B: **CHECK [PORTFOLIO](#) OR [GITHUB](#) FOR MORE AWESOME PROJECTS!**

EDUCATION

AltSchool Africa

Apr 2022 – Jul 2023

Remote Full Stack Web Development Program, Full-Time

- Completed a **comprehensive full-time program** with a focus on backend development (Python/Django).
- Built projects involving **data structures, algorithms, authentication systems, and open-source contributions**.
- Applied **Agile/Scrum practices** (standups, sprints, retrospectives) and **remote collaboration tools** (Git/GitHub, pair programming)
- Completed the program and earned certification.

Real Care Model College,

August 2015 – September 2021,

SSCE, Science.

- Excelled in science subjects and actively participated in the robotics club.
- Demonstrated proficiency in time management and organisational skills by balancing academic responsibilities with involvement in extracurricular activities.
